

Session : IMPACTS and SCENARIOS

Keywords :

Impacts : Health, Climate, Pollution (aerosols, VOCs)

Scenarios : Future, Mitigations

Goals : Improved modeling and Policy implications

ORAL Session 1:

Focus on other than China (Taiwan, Africa, Global ..)

ORAL Session 2:

China Focus

Poster session: ≠ 10 (Asia and China)

- 1) Are your results (emission control measures) relevant to other regions?
- 2) How can we verify emission control implementation and effectiveness ?
- 3) What limits your ability to improve the model and future projections?
- 4) What tools are needed to study simultaneously climate, ecosystem and human health impacts to avoid negative effects of emission control?
- 5) How can we consider multispecies, multisectors assessments?
- 6) What can GEIA do to advance impacts and scenarios studies?
