

# GEIA Original Inventories & Emission Reviews

Updated 13 June 2013

## Inventory Projects

Not all of the original projects had original GEIA inventories or emission reviews.

## Original Inventory Information

Characteristics: Temporal Resolutions - Generally annual    Spatial Resolutions - Generally 1x1 degree  
 A-Anthropogenic    N=Natural

## Available Information:

Many GEIA original inventories or updates to them are posted on ECCAD.

EDDAD [http://eccad.sedoo.fr/eccad\\_extract\\_interface/JSF/page\\_login.jsf](http://eccad.sedoo.fr/eccad_extract_interface/JSF/page_login.jsf) provides data and contacts.

DataSet Names: Original inventories are in GEIAv.1    Updated inventories are in other DataSets as indicated.

Many of the early GEIA emission status reviews prepared in 2002 - 2005 are on the GEIA web site.

Main contacts/emails for these status reviews are noted under Reviews.

Many reviews are descriptions of the emissions data that were provided by GEIA rather than full emission reviews.
