

*Brings together people, data and tools to create
Highest quality information on global exchange processes.*

Address Information needs

Quantify the anthropogenic emissions and natural exchanges of trace gases and aerosols that drive earth system changes

What information is/will be most valuable for major issues?

Exchange information

Facilitate use of this information by the research, assessment and policy communities.

What communication tools are/will be most effective?

GEIA Activities & Opportunities > 2009

Other Ideas???

GEIA Activities & Opportunities > 2009

Update/upgrade Information (GEIA Web sites, Network, ...)

Contribute to International Assessments (IPCC, HTAP, AC&C, ...)

Promote Advances in Global Emissions (GEIA Conferences, workshops, Summer School,...)

Develop Collaborative Research Programs (GEIA-ILEAPS-IGAC-AIMES, ...)

Contribute to Understanding Completeness and Compatibility of Data Bases (CEC-N.America, ...)

Contribute to documentation of state-of-science on emissions (GEIA Emissions Reviews, ...)

Enhance availability of emissions information (GEIA Catalogue, ...)

Enhance dialogues among researchers and data users (Wiki-based system, E-networks, ...)
